WORK EXPERIENCE

IT Support

Halton Healthcare Services - Oakville, ON - September 2013 to December 2013

Responsibilities

My responsibilities were to maintain and create e-learning courses which were used by all staff.

Accomplishments

I used my experience to improve efficiency of how tasks were completed in maintaining online courses.

Skills Used

Communication was a key factor in this co-op placement, tasks were being constantly passed from one person to another and things could have been easily misunderstood. Also problem solving was very important, sometimes stations which staff use didn't work properly and I had to find an alternative solution for staff to finish their online course.

EDUCATION

Computer Programming

Sheridan College Institute of Technology - Oakville, ON

2014 to 2015

computer programming

Humber College - Oakville, ON

2013 to 2014
